EFFICIENCY

HEALTH & SAFETY

### A NEW GENERATION OF **MODULAR** BIOLOGICAL PARTS WASHER

It cleans your parts without Solvent, while respecting operators' health and the environment.

The biological parts washer is based on a natural regeneration using Human's body principles : temperature with bath heated at 38 – oxygen thanks to the oxygen pump – and micro-organisms to digest / kill the oil and pollutants

This process ensures a cost effective and efficient maintenance.

# THE NEW GENERATION BIOLOGICAL PARTS WASHER THAT FITS THE SIZE OF YOUR PARTS

## MODULAR PARTS WASHER

### OPTIMAL CLEANING PROCESS

- **Biological** Parts Washer heated at 38°C for a high class maintenance cleaning through the brush, the soaking or the sprinkle. **No more solvent.**

### MODULAR SIZE

- A tank with an electronic kit, **3 sizes for the cleaning area**
- Innovation : choose the size of the working area that fits to your maintenance needs

### EASY MAINTENANCE

- **Interchangeable electronic kit**
- **Easy to drain system.** Visual indicator of the fluid level

## PERFORMER PARTS WASHER

### BLUELIQUID

Cleaning solution for biological parts washer

- Water based solution composed of specific surfactants, non-toxic and non-flammable.

### BLUETABLET

Concentrate of microorganisms continuously regenerating the solution.

### MINIMIZE WASTE AND MAINTENANCE

#### Solvent

Draining and complete replacement of the solution

#### Biological parts washer

Bath regeneration with a tablet

## ECOLOGICAL PARTS WASHER

### OPERATORS' HEALTH

**Solvent Free** - Optimal Health & Safety conditions.

### SAVINGS

**Cost Control.** No more inconvenient regular drain thanks to the action of the class 1 microorganisms.

### ENVIRONMENT

**Minimizes waste** and helps protecting the environment.

Innovates in maintenance products.
